

AGROMASTER 2000L TRAILED BOOM SPRAYER BIG TYRE

Agromaster's Semi-hydraulic Big Tyre Boomsprayers are durable and suitable for many applications and it finds use in traditional farming, horticulture, orchards, vineyards and on grasslands. The trailed type 2000L boomsprayer is used for multipurpose crop protection. Sprayer is connected to drawbar of tractor and powered by PTO.

The booms are connected to the damper system from two sides and it enables the distance along the whole arm to be parallel to the ground and provides equal level between nozzles and the surface which will be sprayed. Boom sprayers are suited for crop protection applications such as herbicide, pesticide, fungicide etc.

The following are standard features:

- Polyethylene tank
- Hand washing tank apart from main tank supplies clean water
- Steel chassis
- High pressure pump
- Manual regulator
- 7 partition boom support
- Durable tyres enable use on all terrains.
