

SEMI-HYDRAULIC BOOM SPRAYER

agromaster
we know the soil...

Agromaster's mounted, semi-hydraulic Boomsprayers have hydraulic height adjustment - the Boom can be lifted up and down. This makes manoeuvring in the field a pleasure as the Boom can be lifted when a fence or large plants need to be cleared.

The mounted semi-hydraulic model Boomsprayers have Fibreglass/Polyethylene tanks and a hand washing tank apart from main tank which supplies clean water.

Units come standard with a High Pressure Pump and a Hydraulic mixer to ensure that the chemical and water mixture is homogeneous.

SPECIFICATIONS

Model	BS800/H14	BS000/H14
Capacity	800L	1000L
Boom length	14m	14m
Boom type	Mechanical	
Length without Boom	1030mm	1030mm
Width without Boom	1480mm	1480mm
Total height	2700mm	2700mm
Total length	1210mm	1210mm
Total width	2700mm	2700mm
Total weight	412kg	423kg
Pump type	Membrane	
Pump model	C71	C96
Number of Nozzles	24	
Nozzle type	Conical/TeeJet	
Delivery (lt/min)	71	96
Tank Mixer	Standard	
Tank Material	Fibreglass/Polyethylene	
Pressure safety valve	Standard	
PTO Rotation	540	
Tractor power required (hp/kw)	60/45	70/52
