

FIELDKING CHISEL PLOUGH

FIELDKING

The Fieldking Chisel Plough loosens and aerates soil while leaving organic matter at the top of the soil. Use also reduces the effects of compaction.

The implement acts as a Ripper and cuts weed roots below the surface and helps in breaking bigger lumps to smaller clods.

It can be safely used for heavy duty applications as the shear bolt arrangement protects the implement from getting damaged due to hidden obstacles like underground stones & roots.

SPECIFICATIONS

Model	FHDRIP5
Number Of Tynes	5
Total Length (mm)	2660
Total Width (mm)	2150
Total Height (mm)	1270
Working Depth (cm)	40
Working Width (mm)	1810
Space Between Tynes (cm)	25
Required Power (hp/kw)	60-65/45-50
Total Weight (kgs)	495
