

LINHAI T-BOSS SIDE x SIDE

South Africa's leading Quad and Side x Side Brand

The Linhai T-Boss 410 is an improvement on the legendary Rebel in every dimension. The T-Boss is fuel injected, meaning the T-Boss 410 uses less fuel than its competitors. There is also very little vibration. The T-Boss looks modern from every angle and the LED headlamps provide excellent line of sight at night.

The 2 separate seats are gone and replaced with a single seat, making the ride more comfortable.

The Linhai T-Boss 550 will impress you with durability and low operating costs. With a 493cc engine, this good-looking side-by-side, available in Camo, can easily handle a fully loaded body and a heavy trailer (it can carry up to 300kg) thanks to its powerful reduction and optional all-wheel drive - it will take you to the most inaccessible places. The sturdy, rugged frame cage and sturdy plastic roof protects you when driving through vegetation, along with three-point seat belts providing safety even in the event of an accident.

The Linhai T-Boss 550 EFI 4x4 is a tireless farmer, foreman or hunter, and is suitable for adult operators and passengers. You can further increase the value of your T-Boss with accessories such as windshields, tool or gun holders, sprayers, shredders, blades and other original accessories.
